

Muhammad Ghafuri

Lead Software Engineer | Backend Systems & Integrations

Jakarta, Indonesia | +62 851 8643 6215 | muhammadghafuri6301@gmail.com | [linkedin.com/in/muhammad-ghafuri](https://www.linkedin.com/in/muhammad-ghafuri) | github.com/madaghafuri | porto.madaghafuri.my.id

PROFESSIONAL SUMMARY

Backend-focused Software Engineer with 3+ years delivering APIs, system integrations, and production features for telecom, media, and government clients. Strong in Laravel, Node.js, TypeScript, C#, SQL, Redis, Docker, UAT support, production rollout, and trade-off driven system design.

PROFESSIONAL EXPERIENCE

Lead Software Engineer - PT Inter Sistem Asia (iSystem Asia) Jul 2025 - Jun 2026

CelcomDigi Bhd, Malaysia - Enterprise Order Management System Platforms | Jakarta, Indonesia

- Led development decisions for the Distribution Management System and ERP integration, aligning scope, validation, and rollout trade-offs across internal, client, ERP, and business stakeholders.
- Led production debugging and release coordination for Order Management System/ERP data flows, protecting core order management workflows during UAT, rollout, and change windows.

Software Engineer - PT Inter Sistem Asia (iSystem Asia) Oct 2024 - Jul 2025

CelcomDigi Bhd, Malaysia - Enterprise Order Management System Platforms | Jakarta, Indonesia

- Executed change requests and system improvements across enterprise Order Management System order-management workflow used by business customers to process company-registration agreements.
- Implemented backend and integration changes across Laravel services, Creatio (C#), Microsoft SQL Server, Redis/Node.js support, and client ERP data flows.
- Delivered API updates for item distribution and order synchronization; documented payload contracts, defect fixes, and operational trade-offs for maintainable releases.

Software Engineer - PT Svara Inovasi Indonesia Feb 2023 - Aug 2023

Remote, Indonesia

- Delivered production features for Svara Aircast, a radio streaming automation platform used in media and broadcasting environments.
- Reduced CPU usage by approximately 30% by optimizing file I/O operations and stream-processing paths.
- Designed real-time audio silence detection to improve stream reliability, monitoring, and operational response.
- Balanced modularity versus delivery speed with product and engineering stakeholders to ship maintainable features.

Software Engineer Intern - PT Svara Inovasi Indonesia Feb 2022 - Feb 2023

Bandung, Indonesia

- Built Electron, React, and Tailwind desktop features with senior engineers; translated designs into responsive user interfaces.
- Worked with product owners from requirement clarification through release support.

FREELANCE EXPERIENCE

Software Engineer - SITAMPANPARAT 2024

BPTPH Jawa Barat | Government Client

- Owned backend, geospatial data, Docker deployment, and document generation for a government mapping/reporting system supporting mobile workflows.
- Built REST APIs with Node.js, TypeScript, Hono, PostgreSQL/PostGIS, and Leaflet-backed visualization.

SELECTED PROJECTS

Selected projects: Eventix (Go, SQLite, JWT ticketing API); Manja App (TypeScript, Cloudflare Workers, Hono, HTMX); Next MangaDex (Next.js, REST API); RexSteam (Laravel, MySQL).

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, Python, Go, C
Backend/Web: Node.js, Laravel, .NET, Hono, React, Electron, REST APIs
Data: PostgreSQL, PostGIS, Microsoft SQL Server, MySQL, MongoDB, Redis
Platforms: Docker, AWS, Google Cloud, Cloudflare Workers, Git, SVN

EDUCATION & CERTIFICATIONS

Bachelor of Science in Computer Science - BINUS University Jul 2024

Creatio Developer - Advanced Level; AWS Cloud Practitioner - Dicoding Indonesia; Google Cloud Generative AI Explorer; Google Cloud SQL for PostgreSQL; ICPC participant; TOEFL 626.
